

ITC Labs
Assuring Integrity, Trust & Confidence

Your Challenge:

Today, there are millions of synthetic chemicals used to make pesticides, fertilizers, clothing, cosmetics, household products, electronic devices, children's toys etc. Many of these chemicals help us live longer and more comfortable lives, but some of these highly useful chemicals are also persistent, toxic, carcinogenic and dangerous to our health and the environment. To ensure the permissible and appropriate usage and disposal of these chemicals is a big challenge for the Industry. In addition the industry is also required to manage the burden of regional and global regulatory compliance to gain market access. Chemical analysis and testing is thus vital to understand the quality and composition of chemical substances and materials that are used in products, industrial processes and manufacturing.

Our Solutions:

ITC labs as the leading 3rd party quality assurance partner helps clients face the regulatory compliance challenges. We have more than 28 years of expertise and confidence to offer chemical testing and analysis. With our specialist industry knowledge and advanced analytical instrumentation support, we are able to deliver tailored solutions to complex problems. We offer our solutions under the accreditation of ISO / IEC 17025:2005 (NABL), Good Laboratory Practices and other industry standards. We can also help comply with company specific Restricted Substance Lists.

Our solutions span from routine chemical testing to specialised and complex Method Validation studies. Some of the services offered include but not limited to:

- Pesticides and Insecticide (Technical & Formulations) for Agri purpose (complete as per IS specifications)
- Bio pesticides
- Plant extract based pesticides
- Fertilizers (As per FCO 1985):- Chemical fertilisers, Organic manure, Bio- fertilizers
- Fuels (Coal & Briquettes) Proximate, Ultimate & GCV Analysis
- Chemicals & solvents for purity test
- Products for Residual solvent tests
- Cosmetics (chemical & Microbiological tests) as per IS specifications etc.

Additional Services:

- RoHS/ELV/ WEEE Directive (Restriction of Hazardous Substances)
- Trimethylamine Analysis (Gaur Gum)
- Chemicals for Leather & textile industry (SCCP, Formaldehyde, Chromium VI etc)
- Heavy Metals for Toys (IS 9873 part – 3)
- Azo Dyes etc

ITC lab is recognized by bodies like NABL, BIS, FSSAI, APEDA, AGMARK, MoEF, DRUG CONTROLLER, GLP, ORGANIC etc. to help clients meet complex requirements that the product should meet before being placed in the market.
