

ITC Labs

Assuring Integrity, Trust & Confidence

Your Challenge:

The requirement for testing food and agricultural products at each stage during its lifecycle from farm to fork has become increasingly important with each day that passes. The growing consumer awareness towards health, hygiene and safety of these products along with the complex regulatory environment implies that your product must comply with the relevant standards before they can be sold. The manufacturers, traders and importers are being held liable for sub-standard food products resulting in multi-fold losses to business and brand value.

Our Solutions:

ITC Labs as the leading player in the Food and Agricultural product testing services, ITC Labs offers One Stop Shop Solutions to its clients helping them navigate the regulatory and end user requirements. The lab has in-house analytical, chemical & microbiological set up. The lab is accredited and recognized by major bodies like NABL, BIS, FSSAI, APEDA, AGMARK, ORGANIC etc. to help clients meet complex requirements that the product should meet before being placed in the market.

Our services include testing for:

- Quality of Food Products & Commodities as per FSSAI / BIS
- Claim substantiation
- Heavy Metals detection & quantification
- Ingredients & Chemicals used
- Nutritional Parameters
- Shelf Life studies (Accelerated & Real Time)
- Pesticide Residues
- Antibiotics & Antibiotic Residues
- Naturally Occurring Toxic Substances (NOTS)
- Aflatoxins (B1, B2, G1, G2) & M1 in Milk
- Ochratoxins
- Oils
- Fatty Acid & Amino Acid Profiling etc.
- Plant Extract Based Foods
- Vitamin Test (Fat Soluble, Water Soluble etc)
- Food Contact Migration Testing
- And others as per Client / Regulatory Requirements
